SAFETY

Driver and Passenger SRS Airbags

In the event of a collision, front SRS airbags activate to help protect you and the front passenger by absorbing the force of impact.

RISE Body

Collision safety performance is significantly enhanced by Mitsubishi Motors' RISE (Reinforced Impact Safety Evolution) body, which efficiently absorbs energy and maintains high cabin integrity in the event of a collision.

Pretensioners

Pretensioners automatically tighten the front seatbelts in the event of a collision to help restrain the driver and front passenger.

Anti-Lock Braking System [ABS] with Electronic Brakeforce Distribution [EBD] (GLS)

These systems work together to prevent tires from locking up and avoid collision during sudden braking on wet roads or in other conditions.

ABS ensures that the car remains responsive to your control when braking, while EBD distributes the force generated to all four wheels to shorten braking distance.
